2009—7 pm, at
the CBFS

The Chapter's mission is to promote education for ISACA 's certification exams, spread awareness of IS audit and controls, practices provide quality continuing professional education facilities and provide a framework for meeting and interaction amongst local IS audit and control professionals.

Chapter educational events provide enormous opportunities to share knowledge with professionals who come from diverse fields.

ISACA Muscat Chapter conduct on an average one program every month.

These programs are useful for those appearing for the CISA, CISM or CGEIT examinations.

Wish to be a member? Send a mail to membership@isacamuscat.org

Membership Directors Mr. Said Abdullah Al Mandhari or Mr. Aji Bhaskar would get in touch with you.

Synopsis of the presentation

“The Next Generation IT Security Manager”

Crystal Ball gazing on the role of the Next Generation IT Security Manager has happened in many forums. Each of these attempts has focused on emerging technological horizon and surmised that the Next Gen IT Security Manager should get ready for embracing those emerging technologies. There are quite a few factors beyond adoption of emerging technologies that will distinguish the successful Next Gen IT Security Manager from his unfortunate unsuccessful peers. In a nutshell, the success will come to those who will consciously plan to expect the unexpected. This is not to be handled through premonition but through a structured process that includes, *inter alia*, a revisit to the way risk is embedded into the security management system; evaluating and adapting to the changing demands on the roles to be played by the Next Gen IT Security Manager; and a recognition that security transcends technology. Managing a scenario where security transcends technology involves understanding and implementing human driven and process oriented solutions alongside new technologies and deploy a continuous process to manage the unexpected. This session will consider the scenario described above and present the profile of the Next Gen IT Security Manager

Speaker

Dr K Rama Subramaniam is Director and CEO of Valiant Technologies, a Chennai based information security consulting organization. He is Adjunct Professor of Cyber-Criminology at the University of Madras and India's country representative at International Federation of Information Processing, serving on their technical committee TC-11 dealing with Information Security and Privacy. He is an IBM GIO Alumni and has been a consultant to number of organizations in the banking, manufacturing, outsourcing, law enforcement, judiciary, armed forces and government sectors in India, Far East and GCC countries. He was formerly Certification Director of ISACA Dubai and Bangalore Chapter and Programs Director of ISACA Chennai Chapter apart from being the charter President of the first ISSA chapter in Asia.

About ISACA, Muscat Chapter

ISACA is a 40 year old international non-profit organization established with the objective of promoting governance, auditing, quality assurance, security and controls in information systems. It offers the Certified Information Systems Auditor (CISA), the Certified Information Security Manager (CISM) and the Certified in the Governance of Enterprise IT (CGEIT) certifications- the global qualifications in IT auditing & security management. ISACA's membership is more than 86,000 worldwide. Members live and work in more than 160 countries and cover a wide range of professional IT related positions. There are 179 chapters worldwide. Muscat Chapter, established in 2000 is one of them. The Muscat Chapter was set up under the sponsorship of the College of Banking and Financial Studies (CBFS). Presently Muscat Chapter has a membership of about 250 professionals, drawn from varied backgrounds of accounting, IT, auditing, consultancy, finance professionals, banking and regulators. .
